

## DEALING WITH MEDICAL CONDITIONS

### OVERVIEW

*This policy outlines the responsibilities of all parties when a child with a medical condition attends care. The primary text for guiding this document is "Health Support Planning in Education and Children's Services" (2006). This document lists information about common medical conditions and the roles and responsibilities of educators and families as well as suggesting potential medical direction.*

### INSTRUCTIONS

#### **Leadership will:**

- Oversee implementation of this policy in the rooms.
- Ask families when offering a placement whether their child has any medical conditions.
- Ensure all families with medical conditions receive a copy of this policy.
- Distribute paperwork relevant to the child's condition to their family.
- Audit all medication and associated forms every six months
- Ensure policies are up to date and implemented throughout the Centre
- Create tags for medical conditions and allergies.
- Consult with the Access Assistant Program/ RN Delegation of Care program where child has complex and invasive health needs to be overseen at the site.
- Ensure all children at the site who require individual planning or support for a health, medical or dietary need have the correct paperwork completed and present at the site

#### **Team Leaders will:**

- Communicate this policy to the educators in their room and oversee the implementation.

#### **Families will:**

- Ensure they provide documents to support their child's medical condition.
- Ensure they provide documents to support Complete Medication agreement for all medications. Medication agreements are not required for unmedicated items such as nappy creams, sunscreens, lip balms etc. For some medications, relevant paperwork will need to be completed with a medical practitioner and returned. (See attached chart)
- Be aware that their child may not be able to begin visits until paperwork is completed.
- Supply **medication that is labelled with a prescription label** which lists the child's name, date dispensed, name of medication, strength of medication, dose required, when the dose should be given, other administration instructions and expiry date.
- Inform their child's primary carer and administration staff if their condition changes in any way so changes can be documented.
- Sign the closure of the medication log once the health condition ceases or the action log is full.

#### **Educators will:**

- Read and sign all Medical plans and discuss medical conditions with person in charge of medication/allergies in the room.
- Store all medication in Allergy Buddies which are located in each room's storeroom on the wall out of reach of children.
- Implement medical plans as per medication forms.
- Check medication once per month to ensure it is still in date.
- Inform families when a child's medication is due to expire/out of date.
- Ensure the child's medical requirements are displayed on the allergy chart.
- Ensure allergy tag has an up-to-date photo of the child
- Complete medication log every time medication is administered and note any application of unmedicated topical creams (nappy cream, sunscreen etc.) on the day sheet. Educators must ensure families sight these at the end of every session.
- Sign the closure of the medication log once the health condition ceases or the action log is full.

#### **Transition leaders will:**

- Pass medication forms, medication and any other relevant information onto the child's new primary caregiver before they begin transitions.
- Organise meeting between family and new primary carer prior to transition if complex medical needs exist.

### FORMS

- **ASCIA Action Plans:** For management of Anaphylaxis and allergies (including those without prescribed medication)
- **Non-specific Health Care Plan:** Where a child has multiple conditions being managed by a single health care plan (arranged by a general practitioner or other health professional).
- **Individual First Aid Plan:** Where recommended first aid for a child's condition differs from conventional first aid procedures. If standard first aid is sufficient to treat a child's medical condition, an individual first aid plan **does not** need to be completed.
- **Medication Agreement:** For when regular medication must be administered to manage a child's condition. This does not include emergency medication such as inhalers or epi-pens.
- **Health Support Agreement:** A plan completed by educators, families and a medical professional to support a child's health needs through planned risk minimisation. This form is used for all health needs.
- **Safety and Risk Management Plan:** Must be completed for all health needs, alongside Health Support Agreements to support and document decision making for children requiring health support in the context of the individual site.

### ASSOCIATED POLICIES

Administration of First Aid

Anaphylaxis

Asthma

**Created:** July 2013    **Reviewed:** June 2020

### Chart of Medications and required forms:

<b>Unscheduled</b>	<i>Medications that are sold in other retail outlets (ie supermarkets) in addition to pharmacies i.e. antacids (e.g. Mylanta®, Gaviscon®), paracetamol, aspirin, ibuprofen.</i> Medication Agreement can be completed by parent/guardian only. If pain relief medications are required to be administered more than 3x in a week the 'Agreement' section must be completed by health professional.
<b>Schedule 2</b> Examples: Chlorsig eyedrops, antihistamines, laxatives	<i>Medications that are sold over the counter in a pharmacy without a prescription.</i> Medication Agreement can be completed by parent/guardian only. If pain relief medications are required to be administered more than 3x in a week the 'Agreement' section must be completed by health professional.
<b>Schedule 3</b> Examples: Dermaid, cold + flu medication, worming tablets	<i>Pharmacist Only Medicines that do not require a prescription and are substantially safe in use but require professional advice or counselling by a pharmacist to purchase</i> Medication Agreement can be completed by parent/guardian only. If pain relief medications are required to be administered more than 3x in a week the 'Agreement' section must be completed by health professional.
<b>Schedule 4</b>	<i>Medications that legally require a prescription from a Doctor or Dentist to be dispensed.</i> Medication Agreement can be completed by parent/guardian only. If pain relief medications are required to be administered more than 3x in a week the 'Agreement' section must be completed by health professional.
<ul style="list-style-type: none"> <li>• Controlled drugs (potential for abuse/addiction)</li> <li>• High Risk Medicines</li> <li>• 5 or more medications</li> <li>• Feeding Tubes</li> <li>• Oxygen</li> <li>• Medication administered by injection</li> </ul>	Consult Access Assistant Program and let family know we will need information from a health professional.
